Gulf Marine Services W.L.L. Vol 4, Issue 4, October 2011

New build DP2 Self Elevating barge "GMS Endeavour" alongside her first completed wind turbine installation in the Southern North Sea. This is a significant event for Gulf Marine Services (GMS) as it demonstrates to current and future clients that GMS has the ability to construct and operate new generation high technology barges, even in the harsh weather environment of the North Sea. Her sister vessel "GMS Endurance" has just completed her contract in KSA as our clients continue to discover the capabilities of the "E" Class barges first hand, and how they complement and expand on the work being done by the GMS "K" Class barges. This is a significant achievement as GMS plan ahead for future new builds and further fleet expansion.

CEO Message

Welcome to our fourth edition of the newsletter, I am pleased to tell you that all of our assets are gainfully employed and we are actively recruiting new personnel both on and offshore to expand our business into new areas. Our latest newbuild the GMS Endeavour is now very active at Sheringham Shoal in the UK Southern North Sea assembling offshore wind turbines for Scira Offshore Energy Limited while Kelo and Kudeta have successfully mobilised on the Adma water injection project for J Ray Mcdermott. Our latest contract news is that GMS has won a long term well services contract for Kawawa with Adma Opco and is mobilising a well services spread at our base in Mussaffah at the time of writing.

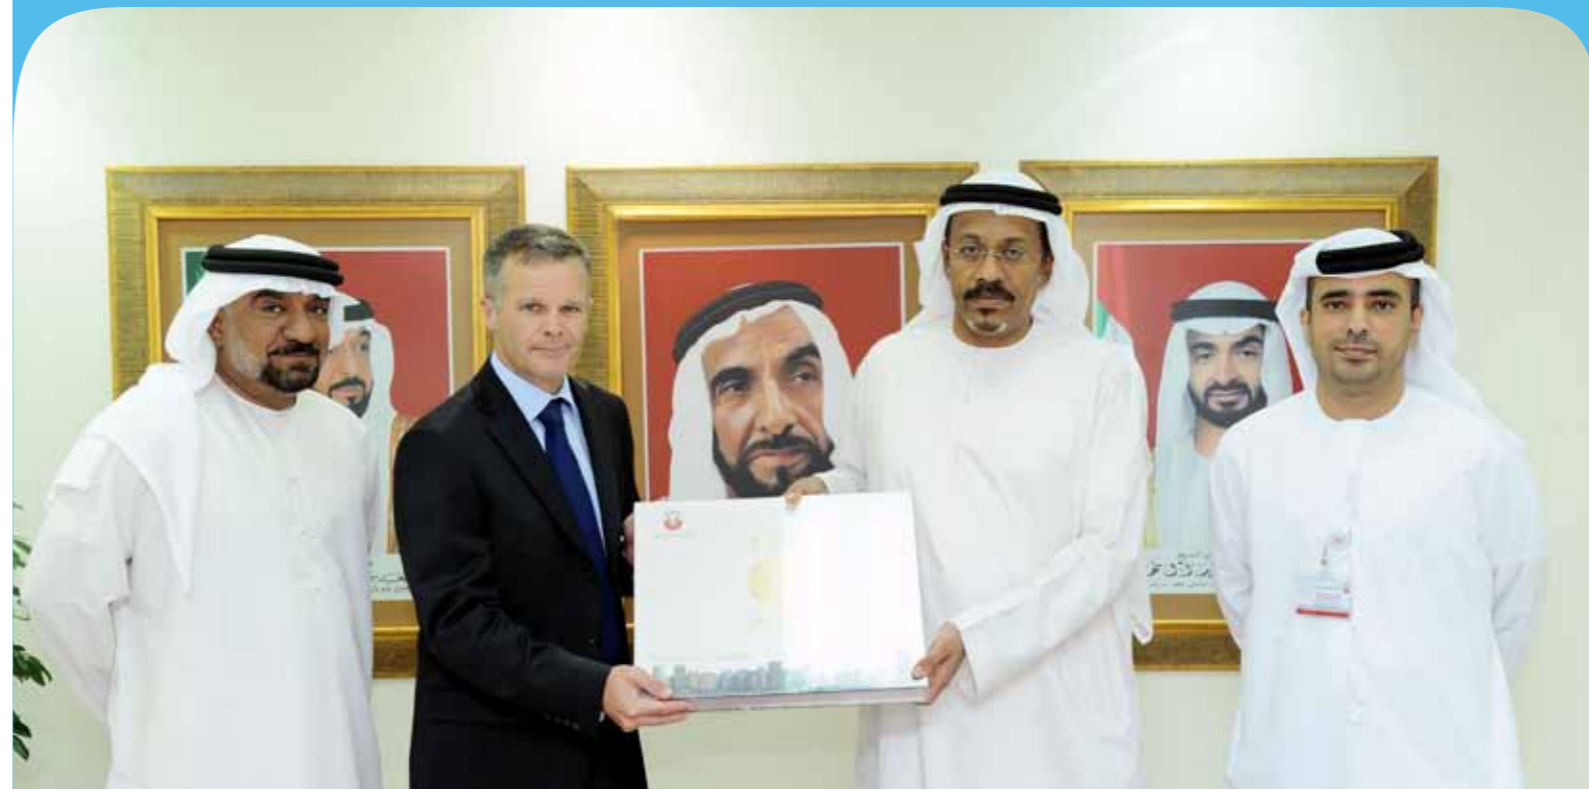

The GMS Endurance has successfully completed the Saudi Aramco Karan hook up and arrived in Abu Dhabi waters to commence a contract with NPCC at Umm Shaif. Our jack up barges Kikuyu, Kamikaze and Naashi continue to operate well on their long term projects and we have an article in this publication about Kikuyu for you to digest.

Our two AHTS vessels continue to fulfill their contracts successfully while the floating barge Khawla is about to depart for RAK waters.

Our yard has also reached a safety milestone, as I write this foreword, that is one year without an LTI. Congratulations to all concerned.

I am sure you will see many new images of our new rigs in this publication as well as new faces who have joined us recently. We will be awarding a prize to any crew member or office employee who provides an interesting and well written article for publication in the next edition of Jack Flash, details of that will be in this edition. I look forward to reading the submissions in due course.

Kikuyu went on hire to Occidental Qatar in January 2005 and since then has remained in their service performing a wide range of offshore tasks ranging from Well service to heavy lift and construction/accommodation support. Oxy were quick to re-secure the services of the barge on the completion of her previous contract in 2010 and she will remain in their service at least until 2013. During the last 6 years the barge has performed safely and efficiently due to the skill and dedication of the onboard crews and the encouragement and support offered by the on board Oxy Reps and especially Well Service Superintendent Mike Myers, based in Oxy Doha office. The Kikuyu's performance and achievements have been featured in several Oxy publications and seminars, and the concept of self propelled self elevating well maintenance has been adopted in other areas of the company's operations. Oxy and Kikuyu are an excellent example of how client and contractor can work together to achieve their mutual aims and objectives, and this valuable and effective relationship is appreciated by all associated with the Kikuyu operation and promotes safe, efficient and effective operations.

GMS ENDEAVOR

At Different Positions in Great Yarmouth, United Kingdom for Wind Farm Project

Wind Turbine Installation

GMS TECHNICAL DEPARTMENT

With the proficient team, right communication channel, cooperation and vast experiences combined, we are proud to announce that the Project Team was able to successfully complete the Refurbishment and Maintenance of 3 K-Class Barges namely Khawla 181, Kawawa 4304 and Kudeta 4305.

It was all done ahead of schedule and with that, we have gained an overall savings of 9% as well.

We are truly confident that with the same team and unending support from the management, we will be able to continue our remarkable achievements on any upcoming projects.

KHAWLA 181

Project Schedule: June – Aug 2011

Client: RAK Petroleum

Main Scope:

- Installation of 8 Additional Accommodation (64 persons)
- Modules Installation of Rignet VSAT & TV Antenna
- Installation of PTW office, Chiller & dry provision
- Completed Panama and ABS Class Requirements

Total Budget Savings as of 31 Aug.'11 (5%) as per budget allocated

KAWAWA 4304

Project Schedule: July – Aug 2011

Client: ADMA-OPCO

Main Scope:

- Installation of Sour Gas Line (100% RT of 179 joints & Tested @ 155 bar)
- King Post
- Chemical Frame Structure, & Flare boom rest
- Additional Works (Carpentry _ Electrical _ Structural)
- Maindeck Gratings, Handrails & Coaming
- Fresh Water Piping Repair at Meco Room
- Installation of Halogen Lamp & Garbage Compactor

Total Budget Savings as of 31 Aug.'11 (13%) as per budget allocated

KUDETA 4305

Project Schedule: March – April 2011

Client: J Ray Mcdermott

Main Scope:

- Installation of 3 Additional Accommodation Modules (24 persons)
- Completed ABS Class Requirements

Total Budget Savings as of 31 Aug.'11 (14%) as per budget allocated

FLEET ROUND UP

Atlas

Recently began a contract with J Ray Mcdermott servicing their offshore projects in Zakum field, following some performance issues with their previous vessels from another company. The client is delighted with performance so far and congratulations to Capt Rabih and his crew.

Helios

Continues to service ADOC offshore operations and assisting in supply, anchor handling and rigmove operations. ADOC fully satisfied with the long term service of Helios so well done to Capt Tony and his crew.

Kamikaze

Completed a successful drydock following some deep penetration spud can damage while in Adma service and has returned to work. The Kamikaze continues to provide a valuable service to Adma in keeping their wells serviced and flowing. Well done to Capt Helal and his crew.

Naashi

Similar to Kamikaze, Naashi continues on long service to Zadco and continues to perform to full expectations of the Job Officer and Zadco Management. Well done to Capt Mohamed and his crew.

Keloa and Kudeta

Both engaged in offshore construction work for J Ray McDermott in Zakum field, providing accommodation and construction support. The client is delighted with the services being provided especially with the barges at full accommodation capacity, so a special thanks to Aramark and as well as to Capts Ashraf and Rulyov and their crews.

Kawawa

Recently mobilized for Adma Drilling Division where she will complement the services being provided by Kamikaze. Capt Alexander and his crew are currently busy getting the barge ready and assisting Adma and her contractors in their preparations. Good luck to all for a successful contract start up.

Endurance

She has just completed her contract with J Ray Mcdermott in Aramco fields supporting accommodation and construction activities. She will shortly move to her next contract in Umm Shaif for NPCC, again supporting accommodation and construction activity. Good luck to Capt Vitally and his crew for a successful contract change over.

Endeavour

Based in Great Yarmouth, England, supporting Statoil in the installation of a large offshore windfarm. This is a complicated project involving many other contractors as well as more challenging weather of the Southern North Sea. Well done to Capt Wolfgang and his crew for a successful project so far. Charlie Bungard has recently been appointed as Operations Manager UK so will be the main GMS focal point for all Endeavour operations.

Khawla

Fully mobbed and ready to commence contract with RAK Petroleum on various offshore field activities. Capt Gunther and his crew will do a great job.

Recruitment

Recruitment of additional offshore personnel continues during this exceptional period of high mobilization and activity for GMS. All barges will shortly be fully mobilized on long term contracts to good quality clients, providing excellent job security for our employees, and offshore rotations will then settle into more predictable routines. Recruitment has unfortunately been hampered by interruptions in government services due to Ramadan and Eid.

GMS will also introduce several new policies concerning Overstay Payments, Spot Bonus, CoC Renewals and CV Referrals. Consult the Master of your vessel for full details.

\$200 TO ANY CREW MEMBER OR OFFICE STAFF WHO SUBMITS AN INTERESTING, INFORMATIVE, AND WELL WRITTEN ARTICLE FOR THE NEXT ISSUE OF JACK FLASH.

Welcome Message from HR Manager

As the HR Manager it is my privilege to welcome all new employees to GMS.

The human resources department is established to support GMS and it is our mission to provide first class service to both our staff members and clients with the aim to contributing to the vision and objectives of GMS. These services include, but are not limited to, recruitment and retention, compensation and benefits, policies and procedures, training and development and personnel as well as other related services.

In collaboration with GMS management, the Human Resources Department aims to recruit & retain diverse and highly skilled staff, facilitates organizational development & carries out training in order to enhance employee's skills, performance and job satisfaction.

Please contact us for all your Human Resources questions or inquiries to facilitate a pleasant employment experience.

Thank You

Nicola Tiffin
 HR Manager
